AI Engineer | LLM Applications & Data Platforms. Built a private RAG application with six-provider LLM routing and deployed team-used SQL context tooling. Brings 3 years in production data engineering and peer-reviewed NLP research.

Technical Skills

Applied AI: Python, retrieval-augmented generation (RAG), pgvector, PyTorch, QLoRA, MLflow, LightGBM, model evaluation
Full Stack: React, TypeScript, JavaScript, HTML/CSS, FastAPI, REST APIs, SQL, PostgreSQL, Docker, API integration
Data Engineering: SQL Server, ETL, Microsoft Fabric, Apache Spark, Kafka, Delta Lake / Delta tables, lakehouse architecture
Cloud & Delivery: Azure, Azure DevOps, CI/CD, automated testing, AKS, Git, Prometheus, Grafana, incident recovery

Experience

Data Engineer | *ExponentHR* *July 2024 - Present | Dallas, TX*
Payroll and HR platform: owns data services, semantic access and AI context across 400 databases and 70 TB.

- Deployed a team-used **AI context harness** for Claude Code CLI, combining schema-derived key relationships and table grain with manually added business annotations; enabled safer SQL joins and faster defect diagnosis.
- Modernized SQL Server reporting with Microsoft Fabric semantic models and natural-language SQL access; tuned indexes and stored procedures to bring queries from 12 to under 4 seconds and support tickets down **40%**.
- Automated database copy and restore with idempotent workflows, closing four failure modes including replication races; reclaimed **5,000 engineering hours** annually by removing manual work across 20 daily runs.
- Accelerated releases from 3 months to **14 days** by owning Azure DevOps CI/CD and aligning development, test, IT and business; automated reporting deployments and Python delivery reporting, with review and test gates.

Data Engineer | *Missouri S&T* *Aug. 2023 - July 2024 | Rolla, MO*
University research and infrastructure: built anomaly-detection pipelines and evaluated NLP sentiment methods.

- Engineered Azure AI Anomaly Detector pipelines selecting algorithms per time-series profile; achieved 95%+ accuracy and flagged a production memory leak **4 hours** before an outage, giving the team time to respond.
- Coauthored peer-reviewed NLP research comparing Python-based VADER and RoBERTa on museum reviews; evaluated sentiment against visitor ratings to expose how sources and methods affect findings (published 2025).

Product Intern | *C2FO* *June 2023 - Aug. 2023 | Kansas City, KS*
B2B fintech working-capital platform: SQL product analytics and requirement documents for preferred offers.

- Translated SQL insights into product decisions; authored requirements that halved resource-allocation time.

Business Intelligence Analyst | *Udaan* *Sept. 2020 - Mar. 2021 | Nashik, India*
New-city B2B commerce launch: owned demand planning, procurement and delivery through a 10+ person sourcing team.

- Hired and managed a 10+ person sourcing team; used demand-based capacity planning to sustain 99.3% order fulfillment.

Business Analyst | *Zomato* *Mar. 2018 - Sept. 2020 | Hyderabad, India*
Food-delivery marketplace: owned pricing intelligence and unit economics for a 300-restaurant partner portfolio.

- Improved contribution from negative 18 to positive 2 rupees per order by rebalancing discounts and ad revenue.

Projects

AutoApply AI (private deployment) | *React, FastAPI, pgvector, LLM routing* *2026*

- Built a privately deployed job-search app with React and FastAPI, using **pgvector RAG** to ground answers in work history; integrated six-provider LLM routing and 11 ATS adapters, backed by 355 backend tests.

FinTune | *Mistral-7B, QLoRA, PyTorch, FastAPI* *2026*

- Fine-tuned Mistral-7B with **QLoRA** for financial sentiment; built FastAPI serving with PII redaction, drift monitoring and a three-state recovery circuit breaker, validated by 35+ tests across model and serving layers.

Real-Time Fraud Detection | *Kafka, LightGBM, MLflow, FastAPI* *2026*

- Developed a Kafka-to-FastAPI fraud-scoring pipeline using an MLflow-tracked LightGBM model on 100K synthetic transactions; added idempotent writes and Prometheus/Grafana monitoring for replay-safe, observable serving.

Education & Certifications

Missouri S&T - MS Information Science and Technology, GPA 4.0/4.0 Dec. 2023
GVP College of Engineering - B.Tech Mechanical Engineering 2017
Microsoft Certified: Fabric Data Engineer Associate (DP-700) | Certified Scrum Product Owner (CSPO)
NLP publication: doi.org/10.1080/10495142.2025.2525123
