

Narendranath Edara

Dallas, TX | +1 (573) 466-6656 | edara.narendranath@gmail.com
narendranathe.github.io | linkedin.com/in/narendranathe

Data engineer with three years building reliable SQL Server and Azure pipelines for payroll and analytics. Owns CDC, data validation, provisioning, and release automation; brings earlier product and business analytics experience at C2FO, Udaan, and Zomato.

EXPERIENCE

Data Engineer | ExponentHR | Dallas, TX | Jul 2024 - Present

- Reengineered SQL Server CDC/SSIS pipelines from full-table reloads to incremental merge-upserts, reducing runtime from 30 minutes to under 8 minutes and compute cost by approximately 67%.
- Automated database copy and restore with idempotent recovery, saving 5,000 engineering hours annually through rerunnable provisioning, security, and CDC setup.
- Owned Azure DevOps CI/CD and cross-team release coordination, shortening deployment cycles from approximately three months to 14 days.
- Built a control-table-driven data validation framework and monitoring for missed, stuck, and incomplete ETL runs; documented CDC schema-change and recovery procedures.
- Migrated SQL Server reporting to Microsoft Fabric semantic models; tuned indexes and stored procedures to reduce query response from 12 seconds to under 4 seconds.

Data Engineer | Missouri S&T | Rolla, MO | Aug 2023 - Jul 2024

- Migrated anomaly-detection workloads from static VMs to AKS with horizontal pod autoscaling, increasing CPU utilization from 12% to 64% and reducing Azure spend by \$3,200 per month.
- Tuned service-specific anomaly alert thresholds, filtering 250 non-actionable alerts weekly and improving signal-to-noise from 1:5 to 1:1.2.

Earlier analytics and product experience

C2FO, Product Intern (Jun - Aug 2023): SQL analysis of financial transactions and user behavior. udaan.com, BI Analyst (Sep 2020 - Mar 2021): demand forecasting and Power BI. Zomato, Business Analyst (Mar 2018 - Sep 2020): competitor analytics and internal search.

SELECTED INDEPENDENT PROJECTS

repo-context-hooks | Python, GitHub Actions, Sigstore

- Published a zero-dependency Python package for versioned repository context, with signed OIDC releases, CodeQL and 330+ tests at v1.0. github.com/narendranathe/repo-context-hooks

JobScout | Python, Flask, SQLite, React

- Built career-feed ingestion with ATS-specific adapters, date and salary normalization, bounded retries, and isolated source failures. github.com/narendranathe/job-scout

SKILLS

SQL, T-SQL, Python, SQL Server, CDC, SSIS, Azure DevOps, Microsoft Fabric, AKS, data modeling, data validation, Power BI. Independent projects: FastAPI, Flask, PostgreSQL, Kafka, Spark, Delta Lake, Docker, GitHub Actions.

EDUCATION AND CREDENTIALS

M.S., Information Science & Technology | Missouri S&T | Dec 2023 | GPA 4.0/4.0

Microsoft Certified: Fabric Data Engineer Associate (DP-700) | Certified Scrum Product Owner

Publication: An Examination of Sentiment Analysis as a Tool for Gathering Visitor Feedback, 2025.
